

NeutraDC

by Telkom Indonesia 

POWERING INDONESIA'S DIGITAL CORE

NeutraDC is Indonesia's foremost data center provider, home to the country's largest eyeball reach to connect millions across an ever-evolving digital ecosystem. We serve as the digital backbone for Indonesia's most established and influential enterprises, guiding their transformation in an era of rapid technological disruption.

As a pioneer in digital infrastructure, we are now a key enabler of the AI ecosystem, accelerating Indonesia's digital future and supporting the next-generation technologies that will reshape how we live, work, and connect.

Our Coverage

NeutraDC is a brand of PT Telkom Data Ekosistem, which is a subsidiary of Telkom Indonesia. NeutraDC offers a pathway for international companies to access Indonesia's eyeballs and digital economy. We offer a robust Digital Ecosystem Hub of data center resources in Indonesia, allowing any party, including hyperscale players, to tap into Telkom Indonesia's integrated digital infrastructure. We offer comprehensive network connectivity locally, and via submarine cables to seamlessly access the rest of the world.

Uptime-certified, Tier III standards, and more.
- **24/7 Monitoring Room**
Real-time operational visibility and response.
- **High-Security Infrastructure**
Physically and digitally secured.
- **Green Energy Commitment**
Solar panel integration and sustainability-first design.
- **Reliable SLA**
Guaranteed service levels for peace of mind.

Our Products

RELEASING MULTIPLE INNOVATIONS

NEUTRA COMPUTE

KEY BENEFITS :

-  High-Performance GPU Infrastructure
-  High scalability based on workload demand
-  Reliable and Customizable Performance
-  Trusted infrastructure, managed by experts
-  Accelerated Discovery & Innovation

“We are committed to becoming the preferred partner for AI transformation and digitalization”

NEUTRA CONNECT

KEY BENEFITS :

-  Single-pane visibility & real-time monitoring across all interconnections
-  Cut time to market with on-demand network provisioning
-  Guaranteed traffic performance with built in enterprise grade compliance
-  Simplified management of diverse ecosystems
-  Bypass the public internet for predictable, SLA-backed performance

**MULTIPLE PROJECTS.
ONE PLATFORM.
ZERO DOWNTIME.**
